From a single item to a shippable pallet
Item Serialization Units

Dec Group ®

At Dec, we strive to develop innovative, customized solutions for packaging processes in the Life Science industries. We aim to guide our clients through each level of the serialization process, from a single item to shippable pallets. The Dec Serialization equipment solutions are designed to simplify the packaging process.

Our Serialization equipment solutions are compatible with all high-tech production facilities and software processes known in the pharmaceutical packaging industry. All standard units can be customized according to the unique requirements and specifications of every individual customer.
